

Safety and Health at Work

2021/2022

4th edition

Objectives

We aim that participants acquire skills in health and safety at work that allow them to train on or conduct preventative action at basic level, namely:

- Know the legal framework on Health and Safety at Work and its liabilities;
- understand the basic concepts of Health and Safety at Work;
- Acknowledge the importance of Health and Safety at Work;
- Identify the main professional and specific risks;
- Implement preventative actions for professional and specific risks.

Who should attend

Those working who work or own small companies (up to 9 workers) who are responsible for basic health and security at work, as laid down in article 6 of the attachment to Decree-Law n° 109/2000, of 30 June, whose activity is not considered high risk.

In general, the program is useful for all those who aim to learn about safety and health at work, including private security professionals.

For security purposes, classes are taught online

Structure

The program aims to meet the requirements of the law on preventive actions and promoting safety and health at work (Law n. º 102/2009, of 10 September 2009), pursuant to article 284 of the Labour Code regarding preventative action.

The program aims to meet the needs of the Private Security Department of the police (PSP), which requires that all those who are trainers in Safety and Hygiene at Work Applied to the Public Security (BASO6 – Segurança e Higiene no Trabalho aplicada à SP) must have a specific qualification.

The program also allows the certification of private security professionals who, in the company they work for or when providing service to a client, become directly or indirectly involved in training or in preventative actions in health and safety at work.

Coordinator: Ludovico Jara Franco

DURATION

October 2021
