

2021/2022

4th edition

Objectives

Provide students with cross-sectional skills in management and administration in specialized areas so that they can develop their management activities (or management support activities) in companies, Public Administration departments, organizations, or businesses.

Who should attend

Applicants include all those aiming to acquire or further their knowledge in management or provide management support to a company, a department within Public Administration, a business or a non-profit organization.

Structure

The Master in Business Administration – MBA Lisbon Atlantic – aims to provide its students with cross-sectional knowledge in business from the perspective of a transactional and global economy so that they can develop their skills in the business management process, in designing their business strategy and plan, as well as in using the analytical tools required to support any Company, Public Institution or business which involves international business issues.

The list of courses and their syllabi, combined with the teaching perspective of our highly qualified lecturers, who are also experienced professionals, allow for our students’ developing their skills and competences.

The program is presented to students as a coherent and open system rather than a set of course units, designed and organized to have a multi-level impact in them so that they can attain the best possible results for their future personal or professional success.

Coordinator: Fátima Castanheira Geda
