Description. Design-oriented research post-graduation, comprising conceptual and practical research.

Methodology. The students will collaborate with the tutors developing an architectural project. It is about reproducing the intensity of an office and a group experience. It is the interaction between tutors, guests and participants that will generate great results and production.

Candidates. Architects from all nations willing to increase their knowledge and research field in housing, and able to demonstrate good skills developing projects in the time given, are invited to enroll our selection process. Candidates can apply for this post-graduation with a master degree in Architecture, Urbanism, Landscape Architecture or Building Sciences.

Length: 1st July to 30th July 2021
